**Matrix of alignment and misalignment between the design and use of schools**

- Learn and apply specific, global examples of **strategies for successful school change** in the context of new facilities, applicable for designers, educators, and school leaders;
- Experience the power of a holistic effort in creating a **resilient school culture** and successfully inhabiting multi-modal, student-centered facilities
- Hear **evidence** regarding the link between innovative learning environments, teacher mind frames, and student deep learning;
- Awareness of valuable **international research collaborations** and the impact these can have on school systems and facilities in the United States
